Experience

UI/UX Designer & Frontend Developer
technos-studio.com

Southeast Sulawesi - Freelance
Jan 2021 - Feb 2022

I worked on web design projects including the responsiveness for the mobile version. Normally we do the kickoff meeting first and I get a rough wireframe from the Project Manager, then I create the mockup. Got feedback and iterate. When the mockup is final I convert it into HTML, SCSS and JS with framework. Working as a designer and frontend developer makes me know which design is effective and which one is not for the development process.

UI/UX Designer & Frontend Developer
konsultan-indonesia.com

Southeast Sulawesi - Fulltime
April 2021 - Oktober 2022
